Response

2. The request for reconsideration and the argument have been fully considered, but it does

not to be persuasive for placing the application in the condition for allowance.

The cited reference (U. S. Pat. -6,266,426) does clearly show a **transducer** (Figs. 3-4)

or speaker, for converting an electrical input signal into an acoustic output signal as claimed.

Regarding claims, the applicants argue no motivation to combine the references. It is not

necessary that the references actually suggest, expressly or in so many words the changes or

improvements that applicants have made. The test for combining references is what the

references as whole would have suggested to one of ordinary skilled in the art. In re Sheckler,
